22 October, 2010

Mr. Greg Myers, Executive Director
Wapakoneta Area Economic Development Council
30 E. Auglaize St PO Box 1716
Wapakoneta, Ohio 45895

Dear Mr. Myers:

Subject: Ohio Job-Ready Site (O.J.R.S.)
Potable Water Capacity at Wapakoneta Site

This letter shall serve to provide documentation for you to approve certification of the Wapakoneta O.J.R.S. The capacity of the city's water treatment plant is currently rated at 5.0 million gallons per day (MGD). The plant is currently being operated at an average daily flow of 1.4 MGD. This offers excess capacity which exceeds the 0.5 MGD that you require.

The Wapakoneta O.J.R.S. is served by a sixteen inch (16') diameter water main which exists on Short Road and is adjacent to the O.J.R.S. The sixteen (16') inch main hooks directly to a 1.5 million gallon capacity elevated storage tank which is located in the West Central Ohio Industrial Park. This tower is approximately one-quarter mile north of the O.J.R.S. I am providing you with an aerial photograph that displays this layout. I am also enclosing a recent copy of our water analysis for your review.

Some of our industrial customers are Miller's Textile, Ametek Westchester Plastics, Superior Metals, Fenix LLC, Wapakoneta City Schools, and Koneta Rubber.

I hope this meets your needs to allow our site to be certified by your department.

Thank you.

Sincerely,

William H. Rains
Director of Safety and Service
City of Wapakoneta
WHR/tlw
