March 12, 2010

Mr. Greg Myers, Executive Director  
Wapakoneta Area Economic Development Council  
30 E. Auglaize St PO Box 1716  
Wapakoneta, Ohio 45895

Dear Mr. Myers:

Subject: Ohio Job-Ready Site (O.J.R.S.)  
Sanitary Sewer Utility at Wapakoneta Site

This letter shall serve as our follow up to provide documentation regarding the sanitary sewer at the Wapakoneta O.J.R.S. It is the intent of this letter to provide documentation which will allow the Wapakoneta site to be certified by your department.

The City of Wapakoneta provides wastewater collection and treatment facilities for the O.J.R.S. south of Short Road. The city's wastewater treatment plant has an average treatment capacity of 4.0 million gallons per day (MGD). Our permitted wet weather flow is 8.000 MGD. The current average daily loading is 2.2 MGD. The excess capacity is approximately 1.350MGD. This obviously provides in access of the 0.3 MGD which you requested as excess capacity for the treatment works.

The O.J.R.S. is served by a twelve (12') inch diameter, gravity sanitary sewer on the north side of the property and a ten (10") inch sanitary sewer on the west side. Both of these sanitary sewer mains flow to a fifteen (15") inch gravity sanitary sewer and then to a pump station near Hardin Pike on the city's south side. The wastewater is then pumped and subsequently flows by gravity to the head works of the city's wastewater treatment plant where it is treated and then discharged to the Auglaize River. I am enclosing an aerial photograph which shows the infrastructure serving this site.

Some of our industrial customers include Miller's Textile, American Trim, Ametek Westchester Plastics, Wapakoneta City Schools, and Koneta Rubber.

The schedule of all one-time is enclosed.

I hope that this meets your current needs for the certification requirements.

Thank you.

Sincerely,

  
William H. Rains  
Director of Safety and Service  
City of Wapakoneta  
WHR/tiw
